Goals

- **Overarching goal:** to bring together the geoscience community interest in Semantic Web, and more broadly Semantic Technologies

- Fully leverage all semantic work happening in our respective communities

1. Discuss potential collaborations and reuse

2. Work towards a broad community-endorsed path forward

3. We seek broad community input and have invited other professional societies and organizations to participate

Format

- Agenda: https://esipfed.github.io/stc/symposium_schedule.html

- Morning
  - Introduce semantics
  - What problems are we trying to solve?

- Afternoon
  - Technical demos
  - Panel discussion with community reps
  - Roadmapping and community next steps

Logistics

- Plenty of time for interaction
  - New use case session in the morning
  - Collaboration match-making session in the afternoon
  - Conclude with a community roadmap discussion

- Generous financial support from ESIP
  - Two coffee breaks
  - A box lunch will be provided (noon to 1pm)
    - We will have a lunch time speaker ~12:30pm

Logistics

- We would like to summarize symposium outcomes and next steps

- Feel free to send comments, feedback, and suggestions
